

*Pulmonary Critical Care Fellowship
Mentor-Mentee Program*

As the part of training of the fellows, we, at Pulmonary Critical Fellowship, have established a mentor-mentee program. This program enables the learners to pair up with a faculty for the duration of training. The composition of each team includes a faculty member and three fellows. Each team could also have a medical resident, or a medical student based on their interest.

The goal of the mentorship program is to help develop key talent through career development, education and learning, and boosting engagement. With the help of these major learning opportunities, mentees should come out of our program with the confidence that they now have the tools, knowledge, and resources to continue to grow in their roles within their community.

This relationship provides the ideal climate for diverse and vulnerable conversations, enabling the mentee to grow both professionally and personally.

This program will focus on skills development, goal setting and career planning, problem solving, networking and in particular at scholarship. It is the expectation that fellows will be involved in research and QI projects. These teams will aid the fellows in finding dependable guidance.

Each team will meet once every 6 weeks and discuss the progress. This will be incorporated in the six-monthly Clinical Competency Committee report.

For the academic year 2021-2022, the teams are as follows:

Team 1	Team 2	Team 3	Team 4
Dr Sinha (faculty)	Dr Pasha (faculty)	Dr Gelaye (faculty)	Dr Farra (faculty)
Dr Singh	Dr Fribourg	Dr Hart	Dr Landa
Dr Kwon	Dr Irfan	Dr Farishta	Dr Farah
Dr Karpole	Dr Yasir	Dr Zakkar	Dr Obarzanek
